Penny Spinners

You'll need:

card stock paper

1 penny per spinner

crayons, colored pencils or markers

scissors

tape

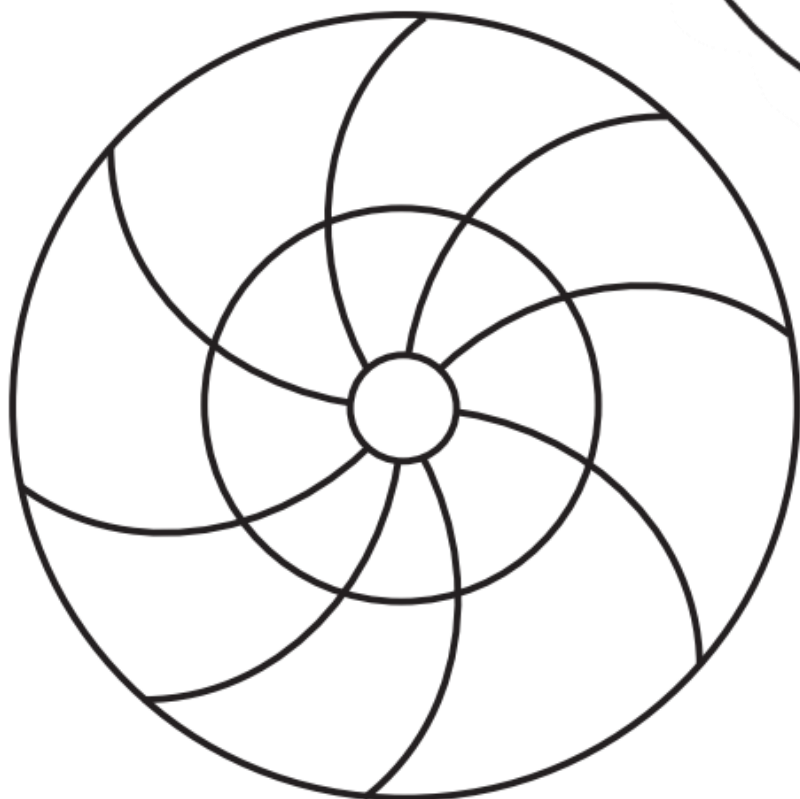

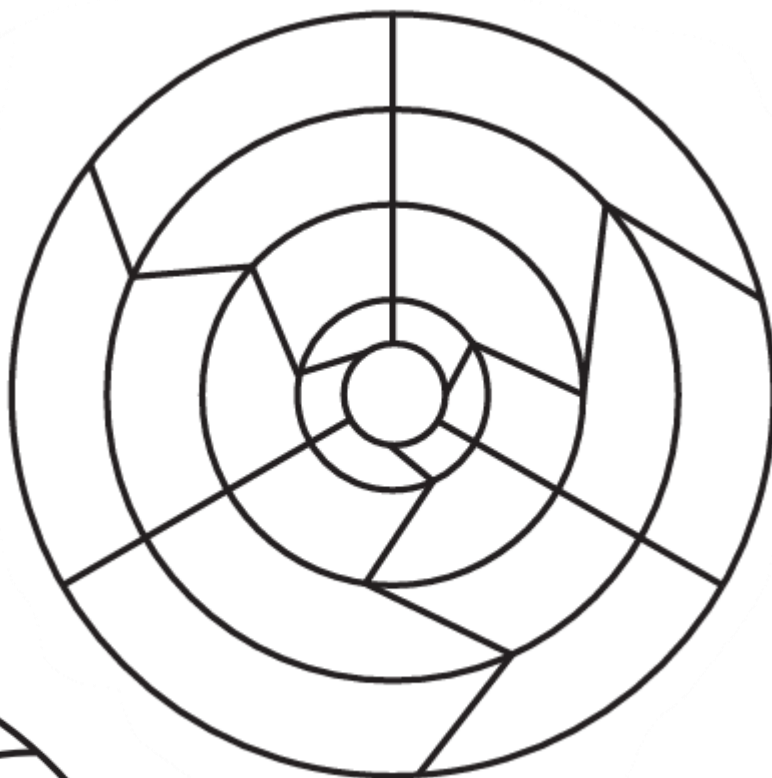

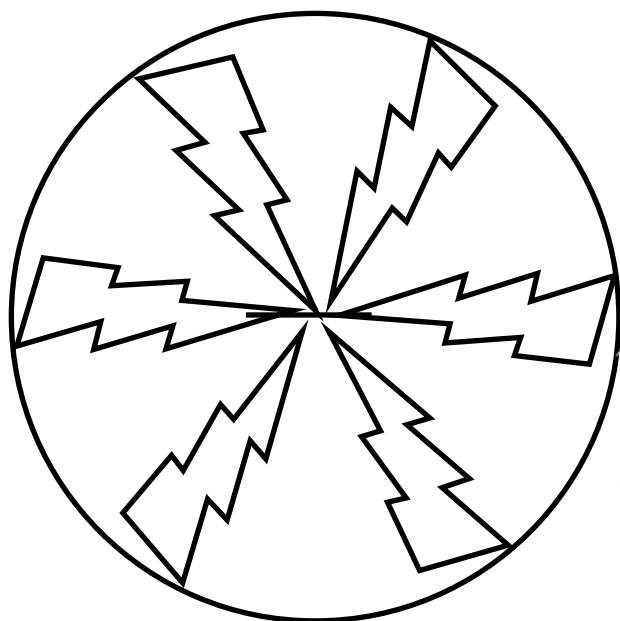

Instructions for Penny Spinner:

1. For best results print spinners on card stock paper. For designs to color print page 2. Page 3 is a template for you to create your own designs. A few optical illusions are listed on page 4.
2. Decorate the circles.
3. Cut the spinners out.
4. Cut a small slit in the center of the circle, a little shorter than the length of the penny. You can gently bend the circle in half to make it easier to cut the slit.
5. Push a penny into the slit, about halfway through.
6. Tape around the edges of the slit where the penny comes through to help hold the penny into place.
7. Spin away and have fun experimenting with different designs and color patterns.
